

**Gay or transgender or maybe both.**

**Gender Fluid**

**Het Roze Huis 's-Hertogenbosch**

Who are we:

The pink house 's-Hertogenbosch is a foundation set up by, for and with LGBs, transgender people (and people with a disability). This organization would like to organize meetings, such as the well-known T & T evenings, give and follow lectures, visit meetings, provide information and expand networking with other LGBT organizations, so that the emancipation of the HLBTIQ the community.

What are we doing:

In addition, we also hold discussions with our supporters / target group, with colleagues, with professionals, both at local and national level. We are also actively lobbying the

national authorities and at European level. So that emancipation comes in a rising line with regard to the well-being of our target groups. We are thinking here of reimbursements that are necessary for, for example, a medical process, training, coaching, equal rights in accordance with human rights and employment.

This way we can offer assistance to the target group (s) and offer support. In addition, we can refer people to third parties if possible.

Our vision, strategy and mission:

We call for a national and European (LGBT) telephone number that people can call with questions, comments, support during the (difficult) process and reporting discrimination to peers.

Together with our fellow emancipants, for example, we can guide this to improve medical care, take action against discrimination and overcome legal prosecution because signals are picked up faster and translated into better cooperation with government agencies, healthcare organizations and sister organizations.

We would also like to see the young people in our ranks so that we can provide our services throughout the entire range

able to offer, but also receive feedback from them so that emancipation has a purpose.

***Not LGBs or TIQ. But just human.***

***Don't think in boxes; think of possibilities.***

***BE PROUD TO BE YOURSELF***
